

Jopwell App Requirements

Last modified: 04/15/2020 by Stefan George

Target Release	iOS App 1.0 Android App 1.0
Document Status	Final
Document Owner	Stefan George
Designer	Jack Zheng
Developers	Chris Salvia, Tom Li
QA	Stefan George

Background and Strategic fit

We think Jopwell App can make users more attentive in job search and enable them to react to job queries more quickly. The App can also be a platform for companies to post jobs.

Customer Research

95% of the interviewees agreed that they will be more attentive to job search if there is an App available.

Questions

A list of questions to be addressed as a result of this requirement document.

Question	Outcome
Should we be supporting Blackberry or windows phones?	It's important but not for this version.
Jobs denied?	If a job is denied, there will be an icon showing denied next to the job applied, but make the icon as subtle as possible.
Get notification for saved job searched queries?	Yes, already notified software team project leaders.

Not Doing

A list of things that will not be implemented in this version.

Item	Reason
Google App authentication	Out of scope and unnecessary for our App.
Blackberry	The layout for blackberry phones needs redesign and currently out of scope for version 1.0.

Change Log

A list of changes that has been made so far.

Date	Changes
02/01/2020	Change #6's priority to 'should' in Requirements.
02/26/2020	Update activities in UI and Design page.
03/15/2020	Add new item to "Not Doing" list.
